

X100PAD3

Auto Key Programmer

User Manual

Declaration

1. This manual is designed for the usage of X100PAD3, applying to X100PAD3 smart automotive diagnosis platform.

No part of this manual can be reproduced, stored in a retrieval system or transmitted, in any form or by any means (electronic, mechanical, photocopying, recording, or otherwise), without the prior written permission of Xtool.

2. Use the device only as described in this manual. The user will be responsible solely for the after-effects of violating the laws and regulations caused by using the product or its data information; in this case Xtool will not bear any legal responsibility.

3. Xtool shall not be liable for any incidental or consequential damages or for any economic consequential damages arising from the accidents of individual users and the third parties, misuse or abuse of the device, unauthorized change or repair of the device, or the failure made by the user not to use the product according to the manual.

4. All information, specifications and illustrations in this manual are based on the latest configurations and functions available at the time of printing. Xtool reserves the right to make changes at any time without notice.

5. **XTOOL** is the registered trademark of SHENZHEN XTOOLTECH CO.,LTD.

6.In countries that the trademarks, service marks, domain names, logos and the name of the company are not registered, Xtool claims that it still reserves the ownership of the unregistered trademarks, service marks, domain names, logos and the company name. All other marks for the other products and the company's name mentioned in the manual still belong to the original registered company.

You may not use the trademarks, service marks, domain names, logos and company name of Xtool or other companies mentioned without written permission from the trademark holder.

7. Please visit www.xtooltech.com for more information on the X100PAD3.

8. Xtool reserves the right for the final interpretation of this manual content.

Xtool X100PAD3 User Manual Instructions

Please read this user manual carefully before using the scanner.

When reading the manual, please pay special attention to the words "Note", "Caution" or "Warning", read them carefully for appropriate operation.

Xtool X100PAD3 Diagnosis System Main Unit Maintenance

Avoid shaking or dismantling the unit as it may damage the internal components.

Do not use hard or sharp objects to touch the LCD screen; do not use excessive force; do not expose the screen to strong sunlight for a long period.

Caution: keep it away from water, moisture, high temperature or very low temperature.

If necessary, calibrate the screen before testing to ensure the accuracy of LCD performance.

Keep the main unit away from strong magnetic fields.

Operation Instructions

For safe operation please follow the instructions below:

Keep the scanner away from heat or fumes when using it.

If the vehicle battery contains acid, please keep your hands and skin or fire sources away from the battery during testing.

Exhaust gas of vehicle contains harmful chemicals, please ensure adequate ventilation.

Do not touch the cooling system components or exhaust manifolds when engine is running due to the high temperatures reached.

Make sure the car is securely parked, Neutral is selected or the selector is at P or N position to prevent the vehicle from moving when engine starts.

Make sure the (DLC) diagnostic link connector is functioning properly before starting the test to avoid damage to the Diagnostic Computer.

Do not switch off the power or unplug the connectors during testing, otherwise you may damage the ECU and/or the Diagnostic Computer.

CHAPTER I About X100PAD3

1. Appearance

1.1. Front View

1.2. Back View

2. Layout of X100PAD3 Tablet

2.1. Top View of X100PAD3 Tablet

①USB3.0 interface: Wired data transmission

2 Mini HDMI interface: Transmission of audio and video

③DB15 interface: Subsequent extended reservation port

(4)DC charging port: Charge for equipment, use 12V power supply

⁽⁵⁾Power Button: Power on or power off

2.2. Side View of X100PAD3 Tablet

①Seat adapter: This is reserved for the socket, and can be charged with charging.

3. X100PAD3 Technical Parameters

Operating system: Android

Processor: quad core processor 1.8GHz

Memory: 2G RAM, 64G ROM

Display / touch screen: 1024 • 768 resolution, 8 inch LED Compatible touch screen

Camera: rear camera, 8 million pixels, with flash autofocus.

Sensor: gravity sensor

Audio input / output: microphone, 4 band 3.5 millimeter stereo.

Interface: USB3.0, DC charging port, MINI HDMI, DB15 interface.

Battery: 10000mAh 3.7V lithium polymer battery

Input voltage: +9~+36VDC, compatible with 12V and 24V voltage system.

Working temperature: -20 to 50 C (-4 to 126 C)

Relative humidity: <90%

Appearance size: 275 • 183 • 33.9 (mm)

CHAPTER **I** How to Use the X100PAD3

1. X100PAD3 Activation

1.1. Please activate X100PAD3 before you use it to test vehicles. And please connect WiFi first.

| | | | | | | | | | | * 💎 🗏 09:18 |

3. Vehicle Connection Diagnosis

3.1. Vehicle Connection Test

- a. Turn on X100PAD3 tablet
- b. Connect cables and X100PAD3 in following order: $(1) \rightarrow (2) \rightarrow (3) \rightarrow (4)$
- c. Switch on the ignition and tap on X100PAD3 application to test vehicles. (Shown as

follows)

- ① X100PAD3 Tablet
- 2 Main cable

OBDII-16 Adapter (Select other adapters if needed)

Measured vehicle

3.2. Precautions before Use

3.2.1. The vehicle power supply has to meet the normal voltage limits DC 9-15V

3.2.2. Users should check the position of the DLC port and ensure the OBDII 16pin connector and the DLC port are correctly aligned before attempting to connect.

3.2.3. When taking some special functions tests, users are required to operate the device according to operating instructions. For vehicle, it has to strictly meet the requirements, for example, the conditions that some vehicle models need to be reached are as follows: engine temperature $80^{\circ}C/105^{\circ}C$, turn off the loads (such as headlights, air-conditioner, etc.), put accelerator pedal in released position, etc.

3.2.4. If users can not find the tested vehicle model or electronic control system in the X100PAD3 test menu, they may need to update the software or consult Xtool technical service department.

3.2.5. Please ensure that only official XTOOL cables and connectors are used to prevent damage to the unit.

3.2.6. Before powering off the unit, please ensure that you cancel or complete the current task or function and return to the main interface, then power off.

3.2.7. Do not use excessive force to operate the touch screen.

3.2.8. During long period of non-use, please disconnect the power and turn off the X100PAD3 unit.

4.Special function and Diagnosis

4.1. Menu Options

4.1.1. After the X100PAD3 mainframe is connected to the vehicle via main test cable, Immobilization can be performed. The Immobilization interface is shown as below:

4.1.2. X100PAD3 lists mileage adjustment separately. The Dashboard Recovery interface is shown as below:

4.1.3. Users can choose the relevant menu for the vehicle being tested: selection for **Europe** will enter the European cars menu, selection for **Asia** will enter the Asian cars menu, selection for **America** will enter the American cars menu.

4.1.4. Besides the usual system diagnostic functions, XTOOL also has developed a

series of special diagnostic functions for certain vehicles as follows:

4.2. Test Functions: it can read and clear faults codes for all systems of vehicles.4.2.1. Using BMW as an example, select Common Diagnosis, then select EUROPE. Choose the BMW word. If the word is not showing on the screen, please swipe up or down to display it.

| < 1 | BMW V10.30 | |
|---------------------|------------------|------------------|
| Automatic selection | Manual selection | Manual operation |
| | | |
| | | |
| | | |
| | | |
| | | |

PLEASE NOTE: Different vehicles have different menus and systems. Common main function menu includes the following options:

Read ECU: This function is to read the ECU version information, which is the equivalent of "System Identification" or "System Information" in some electronic control systems.

This will allow you to read ECU related software and hardware versions, models and production date of diesel engine, part number, etc.

Read DTCs: read the trouble codes that are stored in the ECU.

Clear DTCs: clear current and historical trouble codes memory in ECU. The trouble codes can not be erased without eliminating the fault that the code relates to. TIP: Save or print the currently stored fault codes before clearing them to provide help in the case of an intermittent fault.

| 4.2.2. Toolbar function | buttons descriptions |
|-------------------------|----------------------|
|-------------------------|----------------------|

| Function Buttons | Descriptions |
|------------------|---|
| Ĵ | Return to previous interface |
| ſ | Print test data |
| Ď | Click to record the data, click again to send your feedback to XTOOL service center |

After clicking the data record button the second time the data feedback page will appear as shown below, showing diagnostic software version, vehicle being tested, and the steps performed in the diagnostic process. Users can then enter the nature of the problem and any other relevant information and send the form to the Xtool engineering department.

| <] | BMW | | |
|-----------|-----------------------------------|------------------|-----------|
| | | | |
| Automatic | Comfirm ve | hicle profile | operation |
| | Model series: X'_F25 | | |
| | Model: X3 20iX | | |
| | Version: EU_LL | | |
| | Steptronic: AUTO | | |
| | Model year: 2015_11 | | |
| | Vehicle identification number: WE | 3AWX3102G0L60271 | |
| | Yes | No | |
| | | | |
| | | | |

4.3. Read ECU

This function is used to read ECU version information, which is the equivalent of "System Identification" or "System Information" in some electronic control systems. This will allow you to read ECU related software and hardware versions, models and production date of diesel engine, part number, etc. shown below:

| < D Car | Car Access System | | | |
|-----------------------------------|-------------------|--|--|--|
| | Identification | | | |
| System Name: | Car Access System | | | |
| Programming date: | 2018.07.13 | | | |
| Date of manufacture (DD.MM.YYYY): | 30.09.2015 | | | |
| Supplier: | Temic | | | |
| Series number : | 2152680091 | | | |
| Chassis number: | WBAWX3102G0L60271 | | | |
| | ОК | | | |
| | | | | |

4.4. Read DTCs

Select **Read Fault Codes** to read the trouble codes stored in the ECU. The screen will show the trouble codes and their definition, shown below:

| < 1 | لم | Trouble codes | đ |
|-------|-----|---|--------------------|
| 01331 | (0) | Driver side door control module - No signal/communication | Active/static |
| 01332 | | Frt.pass. side door control module - No signal/communication | Active/static |
| 01333 | | Left rear door control module - No signal/communication | Active/static |
| 01334 | | Right rear door ctrl. module - No signal/communication | Active/static |
| 00466 | | Steering column electronics control module - No signal/communication | Active/static |
| 01320 | | Climatronic control module - No signal/communication | Active/static |
| | | Eras | E DTC Freeze frame |
| 0 | | ० < ○ □ ०) छौ ⊄् (• | • |

Tip: In the process of diagnosis, if the device shows "System is OK" or "No Trouble Code", it indicates that the ECU has not detected a fault in any of the circuits that it monitors. If there is a fault which is not being recorded it may be that the fault is with a part of the system not under the control of ECU, such as a mechanical system fault. It is also possible that the signal of a system sensor may be incorrect but still within the ECUs stored limits, this can be verified in Live Data.

4.5. Clear DTCs

4.5.1. Return to the previous step, select **Clear Fault Codes** to clear the current and historical trouble codes memory in ECU. Performing this function will clear all the current and historical trouble codes. Please ensure that the trouble codes have been recorded before clearing, shown below:

| \langle | | BMW V10.30 | | | | |
|-----------|-----------|-----------------------------------|---------------|---|-----------|--|
| | | | | | | |
| | Automatic | Comfirm ve | hicle profile | | operation | |
| | | Model series: X'_F25 | | | | |
| | | Model: X3 20iX | | | | |
| | | Version: EU_LL | | | | |
| | | Steptronic: AUTO | | | | |
| | | Model year: 2015_11 | | | | |
| | | Vehicle identification number: WE | | | | |
| | | Yes | Ν | 0 | | |
| | , | | | | ļ | |
| | | | | | | |
| | | | | | | |

4.5.2. Click **YES** to confirm the operation, if the communication is normal, it will show "**Trouble Codes has been Cleared Successfully**" or "**Trouble Codes Cleared**". Generally, users will need to re-read trouble codes after clearing them to confirm that the trouble codes have been cleared.

5. Settings

By selecting **Settings** users can set the language, unit and other system related options. Languages: select the language. Please tick the required option from the multi-language options on the right.

| < | _ | Se | ettings | | | _ |

Units: Select unit of measurement. Users can select Metric or British Unit.

6. XCloud (English version is coming soon)

All the auto maintenance technicians who use our products can not only look up the maintenance information that we put on our cloud service platform conveniently, and combine the diagnosis result to query, and communicate with other Xtool users in our forum, but can also access various online databases of maintenance and diagnostic skills and vehicle maintenance plans.

7. Update

X100PAD3 updates directly via the Internet using WiFi or wired connection. To access the update application open the X100PAD3 application and click UPDATE , shown below.

X100PAD3 Diagnosis System

8. Report

TOOL

Report is used for viewing and printing the saved files, such as Live Data, Trouble Codes or pictures generated in the process of diagnosis, users also can view a record of which cars have been previously tested. It includes three parts: PDF Files, Pictures and Data Playback.

8.1. PDF Files:

8.1.1. PDF files are the diagnostic reports of Live Data or Trouble Codes that have been saved during diagnosis. Entering **PDF** will allow you to view and print these reports.

| < | | | | Rep | oort | | | | |

8.3. File Management:

Pictures are all the screen capture files saved in the diagnosis process.

9. Remote

If users encounter problems and are not able to solve them, they can open this application and ask for remote assistance.

How to get remote assistance from Xtool Technical Assistance Center:

- a. Open X100PAD3
- b. Click **Remote** and open the **Team Viewer** interface. Generate and display device ID.
- c. Your partner will also need to download and install **Team Viewer.**
- d. Inform your partner of your **Team Viewer** ID and password to enable them to begin remote access of the X100PAD3.

ŪŪĹ

CHAPTER How to Use KC100

KC100 works with VW/Audi/Skoda/Seat 4th and 5th immobilizer software and BMW CAS1-3 and BMW CAS4 immobilizer software. Lets take VW as an example. Since VW 4th and 5th Immo programming needs online programming, please make sure X100PAD3 connect Internet before doing programming. Please find operation steps as below:

- **1.** Please use main cable and OBDII connector (or other relative connector) to connect between X100PAD3 and your car's OBD port.
- 2. Please use USB to mini USB cable to connect between X100PAD3 and KC100.

3. Please switch ignition on position, then enter software as following steps: Immobilization - VW - 4th/5th Immobilizer System

XTOOL

X100PAD3 Diagnosis System

| < <i>D</i> | VW/Audi/Skoda/Seat V27.66 | |
|---------------------|---------------------------|----------------------------|

5. Then follow the instructions that software reminds you to copy new keys.

CHAPTER Location of Diagnostic Link Connectors on

Different Vehicle Models

1. Diagnostic Link Connectors Locations of Various Vehicle Models

*AUDI A6: the OBD plug is on the lower left side of the dashboard, use SMART OBDII-16 connector.

*VW Bollywood 1.8: the OBD plug is below the console, use SMART OBDII-16 connector.

*Benz S320,220 Chassis: the OBD plug is below the dashboard, use SMART OBDII-16 connector.

*Benz C180: the OBD plug is on the left hand side of the engine bay, use Benz-38 connector.

*Benz 300SEL 140 chassis: the OBD plug is on the left hand side of the engine bay, use Benz-38 connector.

*GM Buick: the OBD plug is below the dashboard, use SMART OBDII-16 connector.

*GM Buick GL8 : the OBD plug is below the dashboard, use SMART OBDII-16 connector.

*VW POLO: the OBD plug is below the dashboard, use SMART OBDII-16 connector.

*BMW 735I: the OBD plug is in the right hands side of the engine bay, use BMW-20 connector.

*VW Passat B5: the OBD plug is behind the gearlever and beside the parking brake lever. Lift the cover to access it. Use SMART OBDII-16 connector.

2. Location Diagram of Vehicle Diagnostic Link Connectors

Location diagram of pick-up truck diagnostic link connectors:

Location diagram of utility vehicles diagnostic link connectors:

Link diagram of small car diagnostic link connectors:

NOTE: Each vehicle manufacturer may use additional pins to diagnose a variety of systems. Not every manufacturer uses the same standard. The function on a certain pin will vary from manufacturer to manufacturer. Verify with the manufacturer.

3. Diagnostic Link Connectors Terminal Definition and Communication Protocols

3.1. Standard OBDII Diagnostic Link Connector:

Pin Definition (Reference material)

Various pin definitions as follows:

- 1. Manufacturer definition
- 2. SAE J1850 bus positive
- 3. Manufacturer definition
- 4. Bodywork site
- 5. Signal site

- 6. ISO 15765-4 defined CAN high
- 7. ISO9141 and ISO14230 defined K line
- 8. Manufacturer definition
- 9. Manufacturer definition
- 10. SAE J1850 bus negative
- 11. Manufacturer definition
- 12. Manufacturer definition
- 13. ISO 15765-4 defined CAN low
- 14. ISO9141 and ISO14230 defined L line
- 15. Permanent positive voltage
- [1] 1, 3, 8, 9, 11, 12 and 13 are defined by manufacturer.

[2] 2, 6, 7, 10, 14 and 15 are used for diagnostic communication. Unused definitions can be defined by manufacturers.
