

JPRO® OFF-HIGHWAY FEATURES

- Off-Highway supports listed Off-Highway vehicle connections
- Supports SAE J1939 messages.
- Ability to save and playback log files for Off-Highway specific connections.
- When selecting the off-highway connection type you will be asked if you are connecting to John Deere equipment. Select Yes to connect to John Deere equipment. Select No for all other off-highway equipment.

NOTE: Playing back log files from Off-Highway connections is not supported in JPRO® versions prior to 2023 v1.

NOTE: Appropriate off-highway cables are required to connect to vehicles in JPRO®. Refer to the [Cable Connection Guide](#) for assistance with cable selection and finding connector locations.

Off-Highway Support for Bobcat

- Supports proprietary Faults and sensor data for the listed equipment types, models, and engines:

GENERAL FEATURES

- Diagnoses all vehicle components in a single application.
- Automatically connects to all supported and available data buses on the vehicle.
- Enhanced VIN decoding for North American VINs.
 - Vehicle Series provided when available.
- Displays fault codes for all components on the supported data bus protocols.
- Displays manufacturer flash codes and descriptions for faults when available.
- Access to historical fault data from previous JPRO® connections which can be used to identify intermittent vehicle issues.

NOTE: Requires internet access.

- Provides key data points in graphical displays for vehicle and components.
- Automatically displays all component parameters of interest in the Data Monitor.
 - ✓ Search, sort, or filter capabilities to easily identify parameters of interest.
 - ✓ Graph parameter changes over time.
 - ✓ Export up to the last 5 minutes of graphed data to local file.
- Data can be displayed in Metric or English units of measurement.
- Vehicle Readiness List displays information about each identified component.
- ECUs displayed on the Vehicle Tree with active faults are marked with a red exclamation point.
- Demo mode in Vehicle History enables users to explore JPRO features quickly and easily without needing access to vehicles.
- Access to 'What's New' document showing all supported features from the Connection Selection and Help menu.
- Icons for Fault Guidance and Clear Faults have been updated to prevent confusion.

Education and Troubleshooting Features

- Virtual Truck feature enables exercising JPRO features including bi-directional tests for training and educational purposes without the need for an actual truck connection.
 - ✓ Freightliner truck illustrates a Cummins engine aftertreatment issue and a brake issue with Wabco brakes.
 - ✓ Volvo truck highlighting Bendix capabilities.

- ✓ Komatsu equipment highlighting off-highway capabilities.
- Bendix Demo Truck demonstrates the tests and data available for various Bendix ECU versions and configurations.

NOTE: This is for demonstration purposes only. Tests and data may not function realistically.

- Integrates with Fault Guidance to provide troubleshooting guidance.
 - View troubleshooting information, wiring diagrams and step-by-step troubleshooting procedures for a fault with one click in JPRO® Commercial Vehicle Diagnostics.
 - Interactive Wiring Diagrams make it easier to trace electrical connections.
 - Enhanced integration features from the troubleshooting repair view:
 - View fault related data while simultaneously viewing repair procedures.
 - Clear faults to verify the repair without leaving the Fault Guidance screen.

NOTE: Access to this can be removed. Contact Noregon support for more information.

- Access Bi-Directional functionality directly from the troubleshooting repair view.
- Access to installed Maintenance or Service Data on the Fault Guidance screen.
- Works on vehicle without requiring a VIN.
- The following are currently supported
 - Heavy-Duty engines and aftertreatment systems
 - All Bendix components
 - Wabco components
 - Eaton transmissions
 - Ford and GM medium-duty engine and aftertreatment faults.
- Regular content updates to add more fault and component coverage.

NOTE: Fault Guidance is only available when JPRO® Professional Diagnostic Software with NextStep® Repair is the purchased product.

- View NextStep® Repair information and repair procedures in Fault Guidance when you connect your NextStep® Repair license key to JPRO.

NOTE: NextStep® Repair is a separate annual subscription to an interactive maintenance guide created and maintained by top ASE, OE, and JPRO-certified technicians. Click the NextStep Repair™ main toolbar button to visit the website for details.

- Download Service Data Sheets for Wabco, Bendix, and Haldex brakes, as well as Eaton transmissions

NOTE: only available when JPRO® Professional Diagnostic Software with NextStep® Repair is the purchased product.

- Access to Maintenance or Service Data in the fault window by automatically linking to available service data sheets for the selected fault.
-

NOTE: Fault Guidance and Maintenance or Service Data Sheets for Wabco, Bendix, and Haldex brakes as well as Eaton transmissions are only available when JPRO® Professional Diagnostic Software with NextStep® Repair is the purchased product.

- Repair Mentor, an enhanced vehicle health indicator and assisted diagnostics tool, prioritizes vehicle issues and provides guidance for diagnosis and repair for heavy-duty vehicle connections.
 - Most Likely Repair, available from Repair Mentor and Fault Guidance, provides information on the most frequent repairs for a fault.
-

NOTE: Requires internet access.

- Possible Unrepaired Recalls, available from Repair Mentor and Fault Guidance, provides detailed information on possible NHTSA recalls for the connected vehicle.
-

NOTE: Requires internet access.

- ECU Version Check will inform technicians when a firmware update is available for:
 - ✓ Cummins ECUs.
 - ✓ Detroit Diesel CPC, MCM, and ACM ECUs.
-

NOTE: Visiting the dealership or having the correct OEM software is required to flash an ECU to the latest firmware.

- Overall vehicle health indicators including No J1939 Data, Cannot Detect Engine, Excessive CAN Error Frames, Active Faults Present, DPF Regen Inhibited, DPF Regen Needed, Consumable Fluid(s) Low, Battery Voltage Low, and Cannot Detect ABS.
- Fault Assistance providing technician friendly descriptions for fault status values from both the Fault Display and the Data Monitor.
- FMI Assistance providing technician friendly descriptions for fault code FMI values from both the Fault display and the Data Monitor.
- Industry Terms definitions available from the Fault Grid, Fault Guidance window, and the Data Monitor window.
- EPA Assistance available from the Data Monitor window provides a basic explanation of EPA standards, the systems and technologies involved as well as manufacturer examples.

- Lookup Code Assistant provides a reference for the equivalent term used in an ECU's Service Data Sheet.
- Power Diagram and Electrical Assistance available in Data Monitor to aid in the diagnosis of electrical problems for heavy-duty vehicle connections.
- Diagnostic connector pinout diagrams for Heavy-Duty and Medium-Duty cable connectors to aid in troubleshooting connection issues.
- Provides data bus utilization statistics on live heavy-duty and medium-duty vehicle connections.
- Displays CAN error frame data to aid in diagnosing communication issues.
- The Resource Portal enables quick access to the JPRO Certification program as well as other OEM training resources.
- Link to Noregon's library of training videos.
- Noregon Tech Tips educational and training videos will automatically play during vehicle connections while initial data is gathered to aid technicians in getting the most out of JPRO.
