

## How to Open the Corresponding Disk When Running Mitchell Ondemand Software

Some customers running our Mitchell Ondemand software , dont know how to open the corresponding disk , lets check the details here

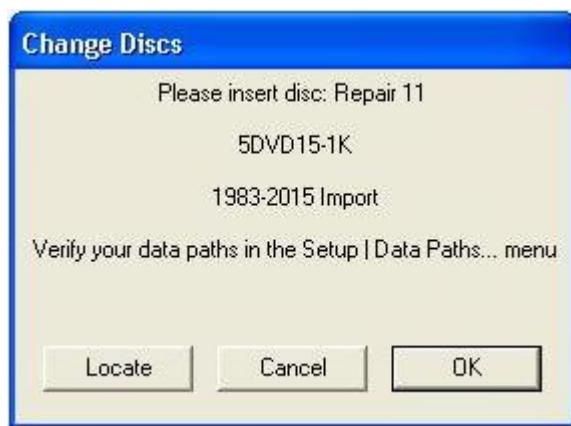

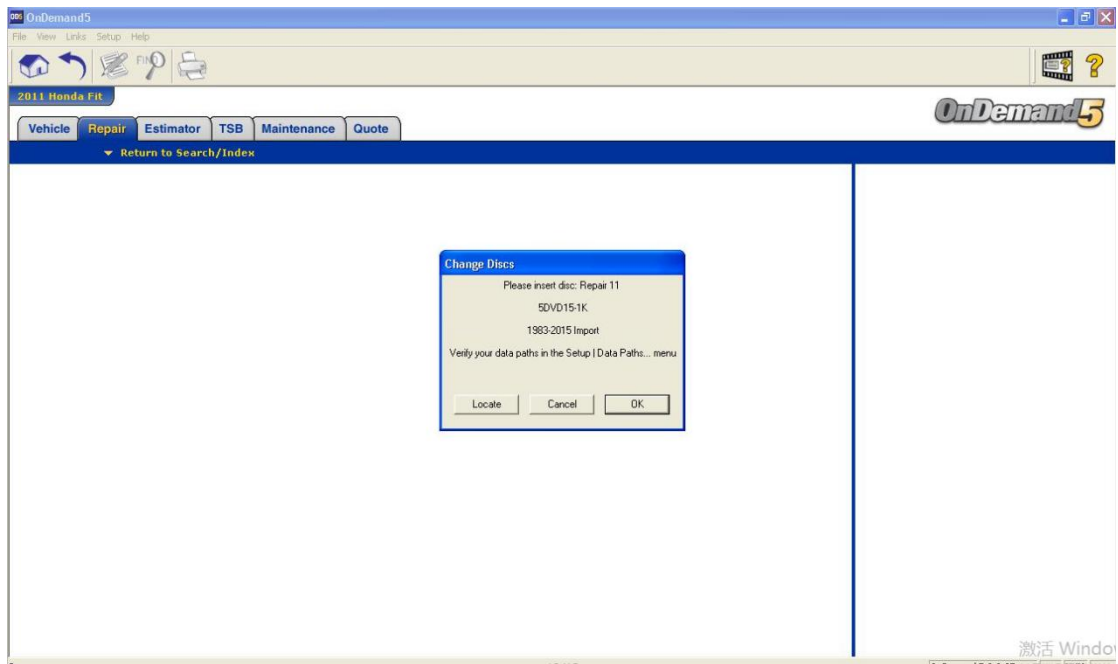

1. Double click Ondemand5 , running Mitchell Ondemand software :

Select the Year , brands ,model and system :

Then you will see the windows like picture display as bellow :

Some customers thought this is the software issues .

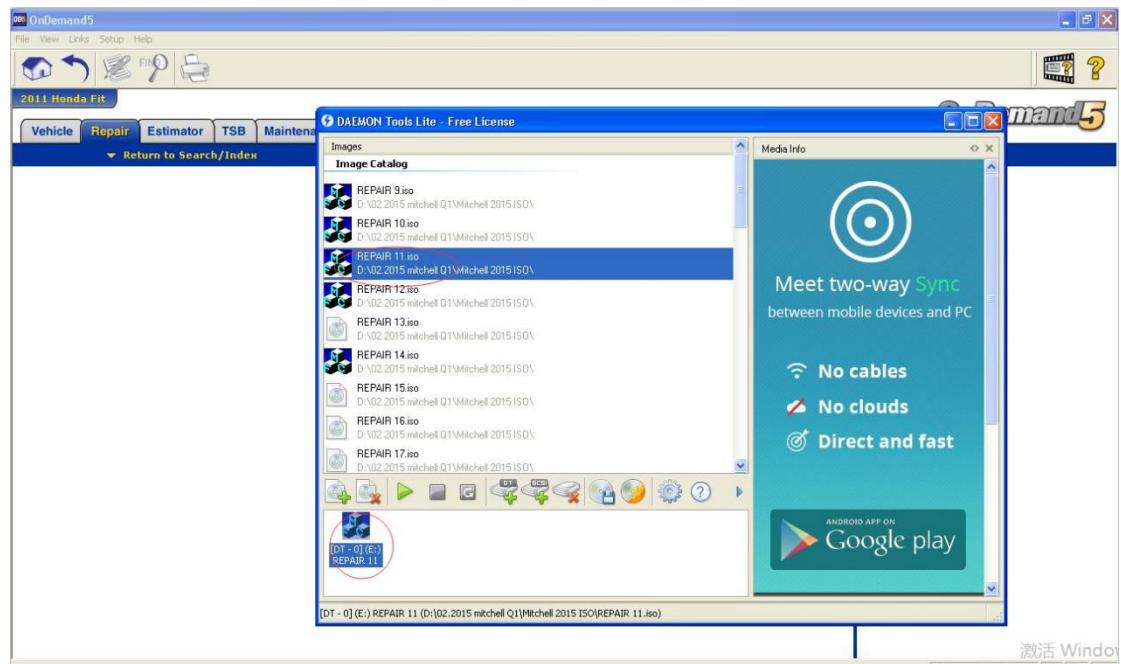

But of course not , this display “ please insert disc : Repair 11 “. Actually we have made the DVD files to the virtual DVD files to the hard disk .

**2. You should running the Virtual drive software from the desktop :**

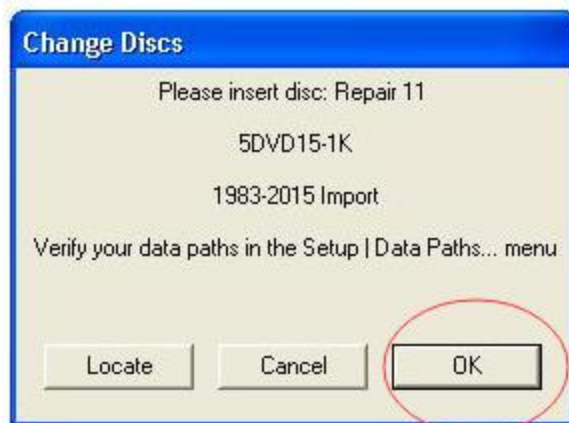

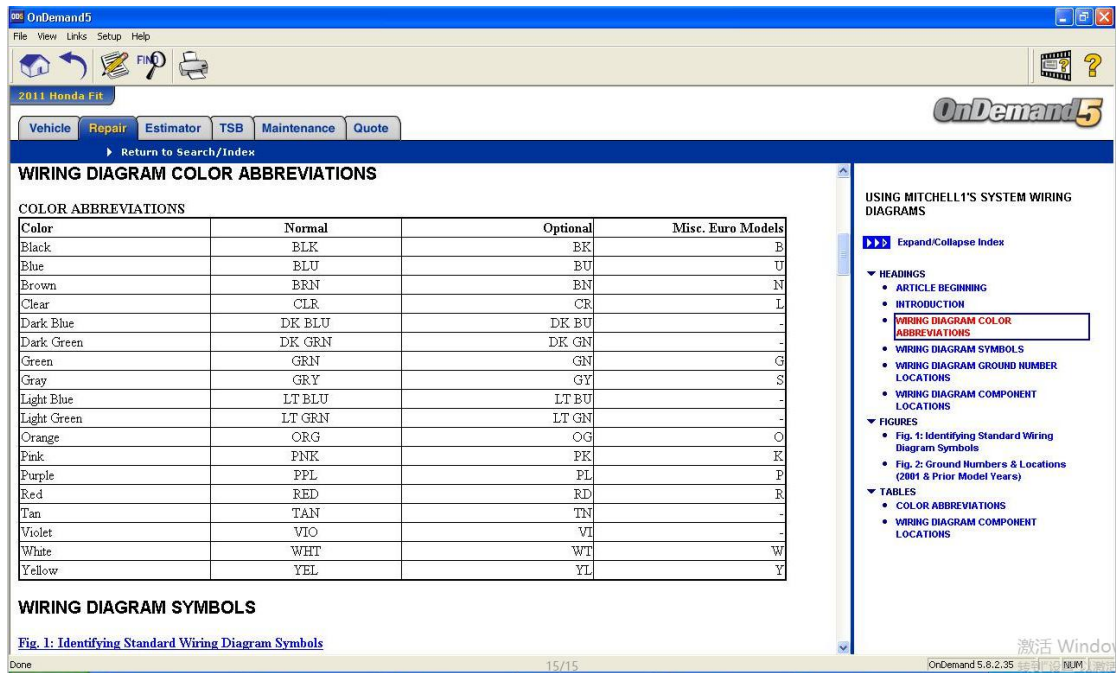

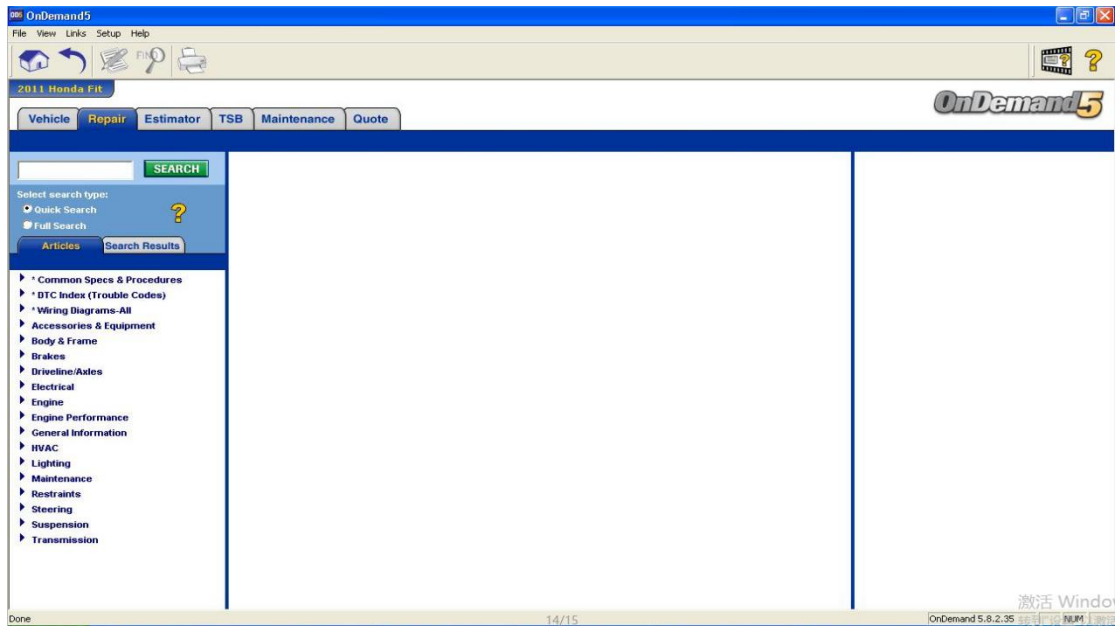

**3. Running the corresponding DVD file :” REPAIR11.ISO” , you will see the details like the picture**

display :

4. Back to Demands5 software , you can click OK , and you can check all what you want to see now
