Trucks Delphi ETC3

Reading and writing via OBD2 connector via CAN-bus of Delphi ETC3 ECUs used in

DAF, Kenworth, Peterbilt, Hyundai trucks.

DAF/Industrial Delphi ETC3

Delphi ETC3 REV A/B/C ECUs based on MCU NXP MPC5566 with internal flash memory 3 Mb.

Reading of map area and writing with checksum correction via CANbus via OBD2 or on the BENCH.

REV 0 and REV H ECUs are not supported.

Hyundai Delphi ETC3

Delphi ETC3 ECUs based on MCU NXP MPC5566 with internal flash memory 3 Mb.

Reading of map area and writing with checksum correction via CANbus via OBD2 or on the BENCH.

Trucks Delphi DMCI CAN

Module for reading and writing by CAN-bus Delphi DMCI ECUs used in DAF and Hyundai trucks.

Ecu is based on MCU Motorola MPC561 with internal flash memory 2.0Mb.

Allows to read and write calibration area through CAN-bus with checksum correction on writing.
