SN: Tool Serial Number

1.2 Support Protocols:

SAE-J1850 PWM, SAE-J1850 VPW, KWP2000, ISO-9141, CANBUS, SINGLE CAN

1.3 Packing List:

- SuperOBD SKP-900 main unit,
- Main Cable,
- Honda-3 connector,
- Kia-20 connector,
- Hyundai/Kia-10 connector,
- ➢ USB cable,
- SuperOBD SKP-900 User's Manual, CD

2. Menu Introduction

Menu has 7 options as follows:

2.1 IMMOBILIZER

It let you program auto transponder keys, auto smart keys and auto remote keys for European cars, American cars and Chinese cars.

2.2 MILEAGE ADJUST

It can allow you to read and change mileage data.

2.3 SPECIAL FUNCTION

It works with various adapters to identify chips.

2.4 HAND OPERATE

In certain condition, it can help you match keys and remotes manually.

2.5 ADD FREE TOKENS

The tokens for SKP-900 Key Programmer are limited. If you use up, you need to contact your dealer to add your tokens by free.

2.6 TOOL SETTING

It can provide you with hardware Info and SN of your device.

2.7 FUNCTION UPDATE

It can help you update software online if possible.

3. Operation Instruction

This operation instruction will tell you how to use your scan tool. For other vehicles, you can perform it by referring to the instructions or according to operation tips on the screen.

Take FORD as an example, if all key is lost, you can use SuperOBD SKP-900 to match key. Firstly, you must connect this device to the OBD II connector via Main Cable.

Select Vehicle: [FORD]→[FOCUS]:

KEY PROGRAMMER	
FORD	1
KUGA	
FOCUS	
MONDEO KEYLESS	
MONDEO KEY	
MAX TDANGIT 10-	
Transit IO	61
SKP-900	

Press [YES], and select 'IMMOBILIZER' according to your vehicle:

```
Press [YES]
```

Press [YES]

ADD KEY: for matching new key

DELETE KEY: for deleting all registered keys and so the lost keys can't be used neither

We suggest that you delete all keys before matching new keys.

Select [DELETE KEY] and press [YES]:

KEY PROGRAMMER				
FUNCTION SELECTION				
IT WILL DELETE ALL REGISTERED KEYS. ADD MINIMUM 2 KEYS SO AS TO START ENGINE [YES]CONTINUE [NO]BACK				
[Yes][No] [02/02]				
SKP-900				

As shown on the screen, you must add at least 2 new keys to start the engine after deleting all registered keys.

Press [YES]

SKP-900

It shows that deleting keys is succeeded. Press [NO]:

According to the instruction on screen, you should insert a new key and turn IGN on. You may see the IMMO indicator light will flash when inserting a key which cannot start Engine.

Press [YES]

Press [YES]

You have successfully programmed the first new key.

Press [NO]:

Press [YES], continue to program another key:

Press [YES]

Press [YES]

So far two new keys have been successfully programmed. Now you can use any one of them to start the engine. Of course, if you want add more keys, you just need to repeat the above operations.

4. Update software

Make sure you have installed USB Driver before updating software.

4.1 Install Driver

For the first time to connect your device with PC via a USB cable, the computer screen will remind you install the USB driver as follow:

Found New Hardware Wi	izard	
	Welcome to the Found New Hardware Wizard Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission). Read our privacy policy	
	Can Windows connect to Windows Update to search for software? Yes, this time only Yes, now and every time I connect a device No, not this time
